

1. What Is Linux

- Linux Features
- Linux Bash
- Set Environment Variable
- Linux Set Command
- Linux export Command

2. Linux Users

- Linux Create User
- Local su Commands
- Linux User Management
- User Password
- Local Groups
- Add User to Group
- Linux id Command

3. Linux Directories

- Linux Home Directory
- Linux pwd
- Linux cd
- Linux Absolute Relative
- Linux Path Completion
- Linux ls
- Linux mkdir
- Linux rmdir
- Rename Folder in Linux

4. Linux Commands

- Linux commands List
- Commands with Example

5. Linux Files

- Linux File Contents
- Open File in Linux
- Linux Edit File
- Linux which command
- Linux head
- Linux tail
- Linux cat
- Linux tac
- Linux more
- Linux less

- Linux strings command
- Linux Print

6. Linux Process

- Kill Process Linux
 - Linux terminating
 - o Linux kill
 - o Linux killall
 - o Linux pkill
 - o Linux xkill
- Nohup Command
- Linux at command
- Linux exit command

7. Linux File Hierarchy

- Linux File Hierarchy
- Binary Directories
- Configuration Directories
- Data Directories
- Memory Directories
- Usr Directory
- var Directory
- Non-standard directories

8. Linux Filters

- Linux Filters
- Linux cat
- Linux cut
- Linux grep
- Linux comm
- Linux sed
- Linux tee
- Linux tr
- Linux uniq
- Linux wc
- Linux od
- Linux sort
- Linux gzip

Sky OOPS
TECHNOLOGIES

9. Linux I/O Redirection

- Linux I/O Redirection
- Linux Input Redirection
- Linux Output Redirection
- Linux Error Redirection

10. Linux Unix Tools

- Linux Unix Tools
- Linux Find
- Linux Locate
- Linux Date
- Linux Cal
- Linux Sleep
- Linux Time
- Linux zcat/zmore
- Linux bzip2 / bunzip2
- Linux bzip2 / bunzip2
- Linux bzip2 / bunzip2
- Linux df

11. File Security

- Linux File Ownership
- Linux chgrp Command
- Linux File Permission
- Linux chmod Command
- Linux chown command
- Linux Advance Permission
- Linux File Links
 - o Linux Inodes
 - o Linux Link Directories
 - o Linux Hard links
 - o Linux Soft links
 - o Linux Remove link

12. Linux System Admin

- Linux Admin Commands
- Linux uptime
- Linux service
- Linux pm2
- Linux wget command
- Linux ftp or sftp
- Linux free Command
- Linux top
- Linux last

Sky OOPS
TECHNOLOGIES

- Linux ps
- Linux shutdown
- Linux info
- Linux env Linux du
- Linux init
- Linux Nano Editor
- Linux shred
- Linux mount
- Linux route

13. Linux Networking

- Linux ifconfig
- Linux ip
 - Linux telnet Command
- SSH Linux
- Linux mail Command
- Linux traceroute Linux tracepath
- Linux ping
- Linux netstat
- Linux ss
- Linux dig
- Linux nslookup
- Linux route
- Linux host
- Linux arp
- Linux iwconfig
- Linux hostname
- Linux curl & wget Linux Curl Command
- Linux mtr
- Linux whois
- Linux ifplugstatus
- chkconfig command in Linux
- How to change user password in Linux
- Awk Command Usage
- How to unzip files in Linux

Sky OOPS
TECHNOLOGIES

Tools:

- Ubuntu
- Oracle Virtual Box
- Linux OS
- MobaXterm
- Putty

Benefits:

- Linux course Study Materials
- Realtime Experiences.
- Meet and talk to real-time OS Admin
- Mock Interviews
- Job Assistance 100%
- Course Completion Certificates
- Life time careers assistances

Course Details:

- Trainer: He having 10+ experiences in DBA Fields
- Duration:60days
- Fees:9999Rs (120USD)
- Online and Offline Available
